INTRODUCING THE 401GO MOBILE APP

The 401GO mobile app gives participants an easy way to manage their retirement accounts.

Monitor balances

View total account balance, pre- and post-tax balances, and employer contributions. You can also view and change your deferral rates, and get an estimate of how much you will contribute in a year at your current deferral rate.

Manage investments

Get a detailed view of your investment portfolio with percentages. You can add, remove, or adjust the amount of individual investments.

Change beneficiaries

See who your beneficiaries are, and at what percentage rates. You can also add, remove and change beneficiaries to be sure your funds are handled the way you want in the event of your death.

Find the 401GO mobile app on the Apple Appstore and the Google Play Store.
