

Enjoy your retirement plan.

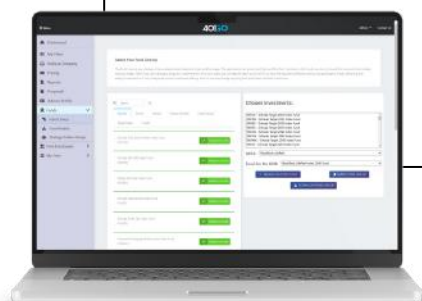

TAKE ADVANTAGE OF THE FEATURES YOUR 401(K) OFFERS

Your retirement plan with 401GO comes with features that make it easy to use and easy to prepare for your later years.

EASY PORTFOLIO SETUP AND MANAGEMENT

Our portfolio builder will ask a few short questions, and then build a customized portfolio that meets your time horizon and risk tolerance.

Once established, investments are easily monitored, changed and balanced from any device.

A MOBILE APP FOR ACCOUNT MONITORING

The 401GO mobile app gives you an easy way to manage your retirement account on the go.

You can view balances, change beneficiaries, adjust deferral rates, switch investments and access money management tools, all from within the app.

No one wants customer service from a robot. If you need help, a team of live agents is available by phone, email or chat.

Intelligent investing made simple.

GET A RETIREMENT PORTFOLIO BUILT JUST FOR YOU

The 401GO portfolio builder helps you create a personalized selection of investments for your retirement savings. This makes it simple for everyone, whether a first-time investor or a seasoned pro, to build an effective portfolio of funds.

How does it work?

Rather than forcing participants into pre-determined boxes, we suggest a customized portfolio based on individual needs and investing goals. You'll be asked a few questions, to determine your time to retirement and your personal tolerance to financial risk.

TIME HORIZON

When investing, it is useful to look at the correlation between time to retirement and risk capacity.

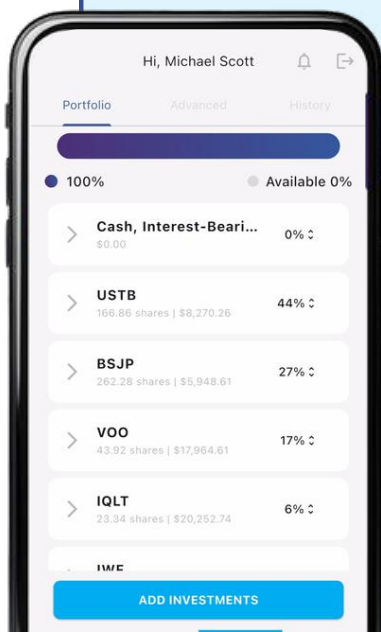

A participant with a long time horizon has more time to recover from short-term market declines, whereas a participant who is closer to retirement should focus on protecting their funds from loss. A big loss close to retirement can be painful. Risk capacity decreases as the time horizon shortens.

RISK TOLERANCE

While risk capacity looks at how much loss one can afford financially, risk tolerance looks at how much loss one can endure emotionally.

Our platform establishes risk tolerance, then recommends a personalized selection which you can then accept or reject. We aim to help you have a good experience investing, and this guided design helps you do what's best for both your wallet and your personality.

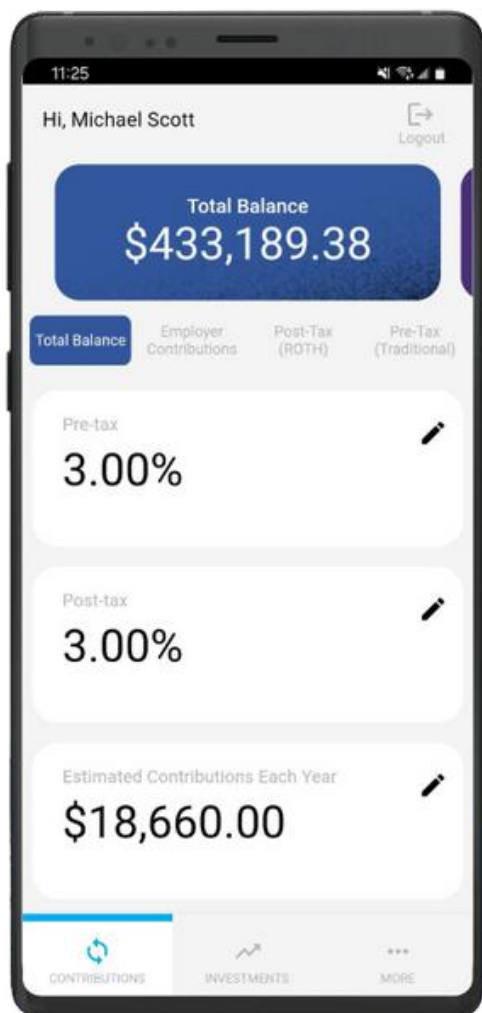

If you're unhappy with the portfolio selections, or you prefer to choose your investments manually, it's no problem. Adding, removing, and balancing investment options is very easy to do using either the mobile app or the browser.

This gives you the freedom to set your investments once and remain hands-off, or to make more frequent, active choices.

Save on the GO.

INTRODUCING THE 401GO MOBILE APP

The 401GO mobile app gives you an easy way to manage your retirement account.

Monitor balances

View total account balance, pre- and post-tax balances, and employer contributions. You can access the history of contributions, and view year-to-date amounts.

Manage investments

Get a detailed view of your investment allocations with percentages. You can add, remove, or adjust the amount of individual investments.

Change deferrals

View and change your deferral rates, and get an estimate of how much you will contribute in a year at your current deferral rate. You can also switch between traditional and Roth contribution types.

Start a rollover

Easily roll retirement funds from an old employer into your current plan with 401GO.

Find the 401GO mobile app on the Apple Appstore and the Google Play Store.

We focus on financial wellness.

ENJOY A FULL SUITE OF MONEY MANAGEMENT TOOLS.
